**San Diego Futures Foundation hires Ric DeVan as
Vice President of Professional Services**

January 25, 2008 -- The San Diego Futures Foundation (SDFF) today announced the addition of Ric DeVan as the Vice President of Professional Services. Mr. DeVan joins SDFF with 14 years of technology industry experience, most recently serving as a Senior Systems Engineer for Level 4 Technologies.

As the Vice President for Professional Services, Mr. DeVan is responsible for managing and growing SDFF's Professional and Technical services business, while directing the overall systems, resources and processes that are necessary to ensure efficient and effective delivery of technical services. He is also responsible for evaluating the way in which new technologies will benefit SDFF clients, and ensuring that SDFF integrates those technologies into client-focused solutions that are both timely and effective. His effective communications skills enable him to bridge the gap between casual and technical audiences.

"Ric brings a reputation as an innovator who creates and fosters strong relationships with customers and partners alike," said Megan Graulich, Executive Director at San Diego Futures Foundation. "Our organization will benefit from his broad industry experience, and he will be instrumental in strengthening business opportunities and relationships for SDFF on a regional scale."

Mr. DeVan has over fourteen years of project management experience and over seven years of experience in information technology project management. As a Microsoft Certified Professional, Mr. DeVan has extensive experience in designing and building business LAN, WAN, and WWAN networked environments. In 2005, working with the San Diego State Foundation and San Diego Futures Foundation as a technical consultant, Mr. DeVan helped design and build the first community based wireless wide area network to serve residents of City Heights and the City Heights Community Technology Center.

SDFF hires Ric DeVan (cont.)

Since 1999, San Diego Futures Foundation (SDFF) has provided technology resources to San Diego County nonprofits, schools and community-based organizations. In addition to computers, these organizations need technical services and skilled staff to help them accomplish their mission. To assist nonprofits with their technology needs, the SDFF "Tech Team" provides reliable, low-cost, professional Technical Services. SDFF's team is experienced in configuring computers, network servers, switches, firewalls, routers, printers and more.

San Diego Futures Foundation (SDFF) is a 501(c)3 nonprofit organization created to establish accessibility to information technology resources, increase computer literacy, and provide training to enable a broader range of citizens to cross the digital divide. SDFF fulfills its mission by addressing three primary areas of need in the San Diego community: access to technology and education, youth training, and technical services for nonprofit organizations.
